Institute of Food Technologists

The Institute of Food Technologists is a professional society of scientists, engineers, educators, and executives in the field of food technology. Food Technologists are professionals who apply science and engineering to the research, production, processing, packaging, distribution, preparation, evaluation, and utilization of foods. Individuals who are qualified by education, special training or experience are extended an invitation to join in professional association with the select group of the food industry's scientific and technological personnel who are Institute members. Membership is worth many times its modest cost, reflecting positive benefits, stimulation, and opportunities for the individual in his/her business or profession.

OBJECTIVES

The Institute, as a non-profit, professional, educational society, has several major aims: to stimulate investigations into technological food problems; to present, discuss, and publish the results of such investigations; to raise the educational standards of Food Technologists; and to promote recognition of the scientific approach to food and the basic role of the Food Technologist in industry. All of these activities have the ultimate objective to provide the best possible foods for mankind.

ORGANIZATION AND PROGRESS

Organized July 1, 1939, at Cambridge, Mass., with a membership of less than 100, the Institute has grown to more than 18,500. It is worldwide in scope with approximately 1500 of its membership overseas.

QUALIFICATIONS FOR MEMBERSHIP

Professional Members. Any person who meets the following minimum requirements: (1) Bachelor's degree or higher from a college or university with a major in one or more of the sciences or branches of engineering associated with food technology; (2) Five years of professional experience in food technology, for which a master's degree may be presented as the equivalent of one year's experience; a doctor's degree, the equivalent to three year's experience.

Members. Any person active in any aspect of the food industry and who evidences interest in supporting the objectives of IFT. Recent graduates who are completing their experience requirement for Professional Member status.

Student Members. Any person who is registered as a full-time student in an educational institution and who is pursuing candidacy for an Associate Degree or higher in one or more of the sciences or branches of engineering associated with food technology shall be eligible for membership as a Student Member. After graduation, a student may convert automatically to Member without obligation for the higher Member dues until the following calendar year.

DUES

Professional Members and Members – $35 a year; includes subscription to *Food Technology* and *IFT World/Directory & Guide*; option to subscribe to the *Journal of Food Science* at members' special rate of $15. Student Members – $7.50 a year; includes subscription to one IFT journal, *IFT World/Directory & Guide*, and option to subscribe to the other journal at $7.50. Emeritus Members – no dues; includes *IFT World/Directory & Guide*, option to subscribe to either or both journals at $7.50 each.

PUBLICATIONS

The Institute publishes two journals. *Food Technology*, issued monthly, is the official journal of the Institute. The *Journal of Food Science*, issued bimonthly, is devoted to basic and applied research papers on fundamental food components and processes. In addition, an *IFT World/Directory & Guide* is published annually.

REGIONAL SECTIONS

Where 25 or more members live within commuting distance of a given geographic area, a regional section may be established. Presently, there are 49 regional sections.

DIVISIONS

Where 50 or more members of the Institute have a common interest in a particular broad-based discipline of food technology, they may form a division. There are presently 12 divisions serving the areas of Carbohydrates, Food Engineering, Food Packaging, Food Service, Microbiology, Muscle Foods, Nutrition, Quality Assurance, Refrigerated and Frozen Foods, Sensory Evaluation, Student, and Toxicology and Safety Evaluation.

STUDENT CHAPTERS

An IFT Student Chapter certificate may be granted to a group of students enrolled in the food science and technology curriculum in a particular school who have organized to form a student club. There are 31 student chapters.

AFFILIATE ORGANIZATIONS

Affiliate certificates may be granted to food technology organizations outside the U.S.A. There are currently 11 chartered affiliate organizations.

ANNUAL MEETINGS

An Annual Meeting of the Institute provides a specially-organized technical program, awards program, and industrial exhibit of equipment, services, processes and ingredients. The program is designed to emphasize current trends and technological developments. Special guest speakers are invited.

AWARDS

The Institute presents the following awards, usually annually:

NICHOLAS APPERT AWARD. Purpose of this award (medal furnished by the Chicago Section, and $1,000 by IFT) is to honor a person for pre-eminence in and contributions to Food Technology.

BABCOCK-HART AWARD. Purpose of this award ($1,000 furnished by the Nutrition Foundation and a plaque by IFT) is to honor a person for contributions to Food Technology that have improved public health through some aspects of nutrition or more nutritious food.

IFT INTERNATIONAL AWARD. Purpose of this award (engraved silver salver furnished by Australian Institute of Food Science and Technology and $1,000 by IFT) is to recognize an IFT Member for promoting international exchange of ideas in Food Technology.

IFT FOOD TECHNOLOGY INDUSTRIAL ACHIEVEMENT AWARD. Purpose of this award (plaque to company) is to recognize and honor the developers of an outstanding new food process and/or product representing a significant advance in the application of Food Technology to food production, successfully applied in actual commercial operation.

WM. V. CRUESS AWARD FOR EXCELLENCE IN TEACHING. Purpose of this award (medal furnished by the Northern California Section and $1,000 by IFT) is to recognize the teacher's role in Food Technology advances.

SAMUEL CATE PRESCOTT AWARD FOR RESEARCH. Purpose of this award ($1,000 and plaque furnished by IFT) is to recognize a research scientist 35 years of age or younger who has demonstrated outstanding ability in Food Science or Technology research.

FELLOWS AWARDS. Any Professional Member who has been active for at least ten years and who has been nominated by the IFT Committee on Fellows for outstanding contributions to the field of food science/technology is eligible to be elected a Fellow of the Institute by the IFT Council.

SCHOLARSHIP/FELLOWSHIP PROGRAM

To attract and encourage students in the field of food science and food technology, the Scholarship/Fellowship program is offered to worthy and deserving students, primarily on the basis of scholastic ability.

IFT sponsors 20 $500 Freshman/Sophomore awards.

One freshman, 34 Junior/Senior Scholarships, and 23 Graduate Fellowships, ranging in amount from $6,000 to $1,000 annually, are sponsored by various food companies and IFT and administered by IFT. Details are available in the booklet, *IFT Administered Fellowship/Scholarship Program 1981–1982*, available from IFT's Scholarship Department.

poultry
Composition of Foods—Poultry Products Raw, Processed, Prepared (book rev.), (7)129
patents, (1)122; (2)105; (3)143; (4)112; (5)184; (6)98; (7)113; (8)108; (9)93; (10)123; (11)96; (12)99
thermal properties of, (11)76
preservatives
use to control microorganisms in food, (10)81
produce
extending shelf life by combining controlled atmosphere and refrigeration (OverView, 5 papers), (3)43
innovative packaging earns 1980 IFT food technology industrial achievement award, (6)42
Recommendations for Chilled Storage of Perishable Produce (book rev.), (6)103
products, new consumer
(1)98; (2)99; (3)128; (4)97; (5)178; (6)76; (7)86; (8)102; (10)98; (11)99; (12)87
New Foods and Beverage Products. Vol. I and II (book rev.), (5)260
proteins
Applied Protein Chemistry (book rev.), (8)116
Nutritional Improvement of Food and Feed Proteins (book rev.), (9)111
plant extenders: effect on microbiological stability of foods, (10)69
Proteins, The. Vol. IV (book rev.), (3)155
rapid analysis by low-resolution pulsed NMR, (12)47
synthetic products, patents: (1)125; (2)108; (3)146; (4)118; (5)190; (6)100; (7)114; (8)112; (9)97; (10)126; (11)97; (12)101

Q

quality
assurance/quality control option in food science education, (1)59
food: improvement through kinetic modeling (OverView, 5 papers), (2)51
food production: influence of a on, (4)42
quality control
Statistical Quality Control for Food and Agricultural Scientists (book rev.), (7)126

R

refrigerated transport
Recent Developments and Trends in Refrigerated Transport (book rev.), (6)105
refrigeration
A History of Refrigeration Throughout the World (book rev.), (10)136
Saving of Energy in the Production of Cold (book rev.), (8)119
regulations
applying science/technology in political decision-making process, (1)81
evaluation of the current U.S. food regulatory process, (3)89
fructose and sugar alcohols in foods, (1)67

liquid foods in flexible packages—a regulatory perspective, (9)58
Packaging Regulations (book rev.), (6)107
Pesticide Residues, A Contribution to Their Interpretation, Relevance and Legislation (book rev.), (2)116
principles, goals, and criteria: a conceptual basis for a food safety regulatory system, (3)101
sugar and caries: regulation of a nonmortal hazard, (1)77
U.S. Food Laws, Regulations and Standards (book rev.), (4)132
rheology
Food Texture and Rheology (book rev.), (11)126
Rheological Techniques (book rev.), (7)127
rice
Rice: Production and Utilization (book rev.), (8)116
ripening
prevention in fruits by use of controlled atmospheres, (3)51

S

salt
dietary (Scientific Status Summary), (1)85; erratum (10)53
fortification with iron, (1)38
sausage
a survey of nitrosamines in, and dry-cured meat products, (7)45
Schramm, A.T.
will head IFT in 1981, (7)10
scientific status summaries
dietary salt, (1)85
food colors, (7)77
monosodium glutamate, (10)49
seafood
production and applications of natural extracts from, (11)51
seeds
Successful Seed Programs: A Planning and Management Guide (book rev.), (11)125
sensory evaluation
ASTM Manual on Consumer Sensory Evaluation (book rev.), (7)127
in distribution, (11)65
in marketing, (11)60
in operations, (11)63
in research and development, (11)57
taste perception in young children, (3)38
wide scope of sensory evaluation (OverView, 4 papers), (11)55
shelf life
raw foods: gas exchange process for extending, (7)65
short courses and workshops
coming events, (1)120; (2)114; (3)141; (4)127; (5)198; (6)91; (7)109; (8)36; (9)100; (10)119; (11)113; (12)91
FSC public review workshop 6/9 (5)26
sensory evaluation methods for the practicing food technologist—program, (11)26; (12)21
societies and associations
news (other than IFT), (1)115; (2)110; (3)136; (4)110; (5)182; (6)87; (7)105; (8)106; (9)91; (10)105; (11)109; (12)97
sodium
Sodium and Potassium in Foods and Drugs (book rev.), (12)107
soft drinks and fruit drinks
patents, (2)108; (3)146; (5)188; (6)100; (8)111; (9)96; (10)126; (11)97; (12)101
soybeans
World Soybean Research Conference. II. Proceedings (book rev.), (12)108
soymilk
Tofu and Soymilk Products. Vol. II. (book rev.), (3)154
standards
U.S. Food Laws, Regulations, and Standards (book rev.), (4)132
starches
patents, (1)123; (2)107; (3)145; (4)117; (5)188; (6)98; (7)113; (8)110; (9)96; (10)124; (11)96; (12)100
potato, factory waste effluents: recovering useful by-products, (2)90
sterilization
direct by free-falling-film sterilizer, of heat-sensitive fluids, (9)49
pouches, institutional: critical factors in filling and, (9)44
See also **food preservation/processing**
storage
bulk, of semifinished fruits and vegetables, (7)56
controlled atmosphere: gas-exchange process for extending shelf life of raw foods, (7)65
modeling and quality deterioration during, (2)78
refrigerated: use of hypobaric conditions for meats, fruits and vegetables, (3)64
sugar
alcohols in foods: regulatory and nutritional aspects, (1)67
and caries: regulation of a nonmortal hazard, (1)77
Appropriate Industrial Technology for Sugar (book rev.), (11)127
Die Zuckerherstellung (book rev.), (9)110
fortification with iron, (1)42
high, foods controversy, (1)75
patents, (1)123; (2)107; 3(145); (4)117; (5)188; (6)98; (7)113; (8)110; (9)96; (10)124; (11)96; (12)100
surfactants
Food, Cosmetics/Toiletries and OTC Drugs Surfactants (book rev.), (9)112
sweeteners
Developments in Sweeteners (book rev.), (2)118
high-sugar foods controversy, (1)75
nutrition and dental caries, (1)70
scientific and regulatory update: applying science and technology in political decision-making process, (1)81; high-sugar foods controversy, (1)75; nutrition, sweeteners and dental caries, (1)70; predicting sweetness from chemical structure and knowledge of chemoreception, (1)65; regulatory and nutritional aspects of fructose and sugar alcohols in foods, (1)67; sugar and caries: regulation of a nonmortal hazard, (1)77
symposia
graduate education for food scientists: appropriate graduate education for person seeking academic career, (1)48; graduate education needs for students from less-developed countries, (1)50; mastership in food control in the U.K., (1)56
See also **IFT, OverView**

T

taste
perception in young children, (3)38
tea
fortification with iron, (1)42
patents, (1)124; (2)108; (3)146; (4)117; (5)188; (6)100; (7)114; (8)111; (9)96; (10)125; (11)97; (12)101
tempeh
Book of Tempeh, The (book rev.), (9)106
Tempeh Production. The Book of Tempeh Vol. II (book rev.), (9)106
texture
Food Texture and Rheology (book rev.), (11)126
tofu
Tofu and Soymilk Production (book rev.), (3)154
tomatoes
effects of milling on mold counts in products, (6)50
sequential heat-cool peeling, (2)40
toxicology
Clostridium perfringens foodborne illness: epidemiological aspects in, (4)80; growth and sporulation in foods, (4)80; mechanism of enterotoxin action, (4)91; relationship between sporulation and enterotoxin production in type A, (4)88
Food-Borne Infections and Intoxications (book rev.), (3)157
impact on food processing—IFT basic symposium, (1)26; (2)24; (3)26; (4)20; (5)36

monosodium glutamate (MSG) (Scientific Status Summary), (10)49
Safety of Foods (book rev.), (8)121
Toxic Constituents of Plant Foodstuffs (book rev.), (7)129
tropical foods
Tropical Foods: Chemistry and Nutrition (book rev.), (2)118

V

vegetables
fresh: extending shelf life by combining controlled atmosphere and refrigeration (OverView, 5 papers), (3)43
Nutrients in Frozen Vegetables (book rev.), (9)112
semifinished: processing and bulk storage, (7)56
use of hypobaric conditions for refrigerated storage, (3)64
vegetable products
patents, (1)124; (2)108; (3)145; (4)117; (5)188, 190; (6)100; (7)114; (8)110, 112; (9)96, 97; (10)125, 126; (11)97; (12)100,101

W

Washington news notes
(1)95; (2)97; (3)73; (4)71; (5)85; (6)73; (7)89; (8)99; (9)71; (10)45; (11)35; (12)85
waste
Food Processing Waste Management (book rev.), (4)136
waste effluents
potato starch factory: recovering useful by-products from, (2)90
water activity
effect on reaction kinetics of food deterioration, (4)36
influence on enzyme reactivity and stability, (5)64
influence on food product quality and stability, (4)42
influence on microorganisms in foods, (5)76
moisture measurement and control: news notes, (4)60
wines
Methods for Analysis of Musts and Wines (book rev.), (9)107
Technology of Wine Making (book rev.), (8)119
world hunger
Overcoming World Hunger—The Challenge Ahead. Report of Presidential Commission on World Hunger (book rev.), (10)138
